Subject to change

Messe Düsseldorf Japan Ltd.

More than 20 Years' Experience in Japan's Plastics and Rubber Industry

When it comes to the Japanese plastics and rubber industry, there are few companies who have the same experience and insight that Messe Düsseldorf has. For more than 20 years, Messe Düsseldorf Group has been operating in Japan via its subsidiary Messe Düsseldorf Japan Ltd. (=MDJ), bringing Japanese exhibitors and visitors to the K and related trade shows all over the world. During this time, we have built close relations with all major Japanese industry associations and other industry groups, and we have been continually monitoring the domestic plastics and rubber machinery market. Naturally, we follow international trends as well. Through our presence at the leading Japanese trade fairs, we exchange opinions with industry leaders and players, many of whom are repeat exhibitors at Messe Düsseldorf trade shows.

Based on our in-depth knowledge of the Japanese market and our strong network, we provide support to foreign companies in the plastics and rubber industries in the following areas:

- **Market Intelligence:** MDJ provides market studies on the structure of the Japanese market and its players. We also monitor trade journals to produce timely market intelligence reports for clients.
- **Trade Fair Participation:** Being a trade fair company, of course trade fair participation is our specialty! We handle all interactions with Japanese trade fair organizers, book the space, arrange booth creation, supply personnel and take care of every detail, including professional follow-ups with visitors and the press.
- **Market Access:** MDJ will put you in contact with potential business partners, arrange meetings, and assist in preparing materials suitable for Japanese audiences. We handle the necessary follow-ups once you are at home, and help take care of your future customers.

In short: We are here to help you!
