Die Welt des Drahtes und des Kabels trifft sich in der Zeit vom 16. bis 20. April zur wire in Düsseldorf. Die wirtschaftlichen Rahmenbedingungen für diese Fachmesse sind günstig. Die Bilanzen der Aussteller und Besucher sind gesund und lassen Investitionen zu. Investitionskredite sind zu Top-Konditionen zu bekommen. Sie werden auch weiterhin in 2018 günstig bleiben.

Renommierte Wirtschaftsforschungsinstitute prognostizieren ein weltweites Wachstum. Es soll der größte Anstieg des BIP seit 2011 werden. Das ifo-Institut geht in seiner Prognose von 2,6 % Zuwachs aus. Das Institut für Wirtschaftsforschung IfW erwartet eine Steigerung in 2018 von 2,5 %. Die EZB rechnet für die Entwicklung im Euro-Raum mit 2,2 %. Der IWF geht von einer Erholung der Weltwirtschaft von 3,7 % aus. Dabei ist die Euro-Zone Trendsetter, voran Deutschland. Japan, China und die osteuropäischen Staaten sowie Russland folgen. Die Wachstumsprognose der USA als größter Volkswirtschaft wird mit 2,3 % vorausgesehen, und zwar auch unter Berücksichtigung der signifikanten politischen Unsicherheiten durch Präsident Donald Trump. Mit diesen Prognosen sind die mikro- und makro-ökonomischen Gegebenheiten gelegt, um innovative Investitionen zu tätigen.

Die Parameter für die wire 2018 spiegeln die positive Grundstimmung der Aussteller und Besucher wider. Insgesamt wurden 65.000 m² Ausstellungsfläche gebucht. Das entspricht einem Flächenzuwachs gegenüber der letzten wire von 9,8 %. Die Flächenausweitung ist dem Mehrbedarf der Aussteller zur Präsentation der Maschinen, Aggregate und sonstigen Dienstleistungen geschuldet. Die Anzahl der teilnehmenden Firmen beträgt 1.180. Sie kommen aus mehr als 50 Ländern. Diese Zahlen zeigen die Internationalität des weltweit größten wire-Events in Düsseldorf. Darin ist ein klares Commitment der Aussteller für die Nr. 1 der Branchenleitmesse zu sehen.

Themenmäßig werden die Trends der Veranstaltung sein:

- Industrie 4.0 mit einer datenmäßigen Vernetzung aller am Prozess Beteiligten
- Rationalisierung zur Kostensenkung
- Ressourcenschonung und Nachhaltigkeit
- Glasfasertechnologie.

Diese Bandbreite ermöglicht es jedem Besucher entsprechend seinen Wünschen alle erforderlichen Informationen zu erhalten.

Insgesamt werden auf der wire mehr als 38.000 Besucher erwartet. Anliegen der Messeveranstalter ist es, die wire den Besuchern in Zeiten des Chattens, Surfens und Mailens zum erinnerungswürdigen Erlebnis zu machen.

Ich lade Sie gern ein, an diesem Erlebnisevent mitzuwirken.

Ich wünsche allen Ausstellern einen problemfreien Ablauf für die Messeorganisation, eine störungsfreie Präsentation der Exponate, ein Kennenlernen neuer Kunden und Begegnungen mit interessanten Leuten, offene und richtungsweisende Fachgespräche, vor allem Erfolg versprechende Bedarfsfälle, sodass sie stolz sein können, Teil dieses globalen Events zu sein.

Den Besuchern wünsche ich eine angenehme Anreise zur Messe, zahlreiche technische und kommerzielle Gespräche mit kompetenten Partnern, Lösungsvorschläge für Ertrag verbessernde Investitionen, Erkennen des technischen Trends und damit einen lohnenswerten wire-Messe-Besuch.

Ich freue mich, Sie auf der Messe begrüßen zu können.

Dr. Gerhard Bartz

From April 16 – 20, 2018, the wire show in Düsseldorf will be the place to be for anyone in the world of wire and cable. The trade fair takes place at a time when economic conditions are favorable. Visitors and exhibitors have strong balance sheets that enable investments. Investment loans can be obtained at best terms that will stay favorable also in 2018.

Renowned economic research institutes predict worldwide growth. It is expected to be the largest GDP growth since 2011. The ifo Institute for Economic Research assumes that the GDP will grow by 2.6 %. The IFW Institute for the World Economy expects a growth of 2.5 % in 2018. The ECB predicts a 2.2 % growth in the Euro zone. The IMF predicts that the world's economy will grow by 3.7 %. The Euro zone – especially Germany – acts as trendsetter. Japan, China and Eastern European countries, like Russia, follow. The United Stated, the world's largest economy, is expected to grow by 2.3 %, even under consideration of the significant political uncertainties the country is facing under the presidency of Donald Trump. These forecasts lay the micro and macro economic foundation for making innovative investments.

The favorable economic conditions for the wire show in 2018 reflect the generally positive mood among exhibitors and visitors alike. A total of 65,000 m^2 of exhibition space has been booked. This is 9.8 % more than for the last wire show. It can be attributed to the exhibitors' need for more room to present their machines, installations and other services. 1,180 companies will exhibit their machines. They come from more than 50 countries. These figures reflect the international character of the worldwide biggest wire event in Düsseldorf. It also shows the exhibitors' commitment to the industry's number one trade fair.

The following topics will prevail:

- Industry 4.0 and its interconnection of all machines, systems, sensors, etc. involved in the production process
- Rationalization measures for cutting costs
- Resource conservation and sustainability
- Fiber optic technology.

This multitude of topics should enable all visitors to obtain the information they require.

More than 38,000 visitors are expected to come to the wire show. In this fast-paced age of online communication, the organizers of the wire show want to make the event worth remembering.
I invite you to be a part of it.

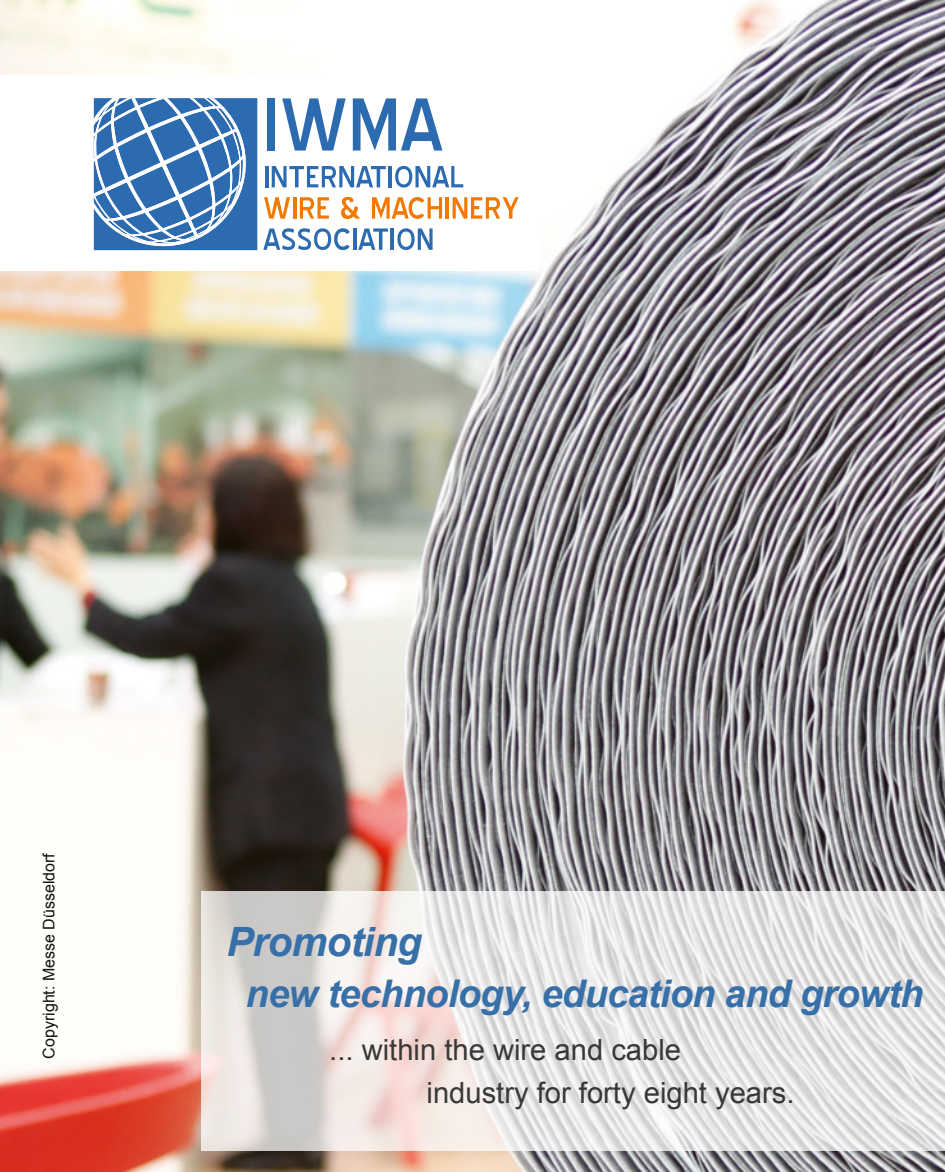

I wish all exhibitors that their preparations for the fair run smoothly, that they may present their exhibits without any disruptions, that they get to know new customers and meet interesting people with whom they can have open and ground-breaking conversations. Above all, I wish them promising inquiries and successful business deals so that they can be proud to be a part of this global event.

I wish all visitors a good trip to the fair, numerous technical discussions with competent exhibitors who provide them with ideas for investments that will improve their outputs and who show them technical trends that make their visit to the fair worthwhile.

I am looking forward to see you there.

Vorsitzender der
International Wire & Machinery Association (IWMA)

Chairman
International Wire & Machinery Association (IWMA)

Willkommen

Es ist mir eine große Freude, alle Besucher und Aussteller im Namen der „International Wire & Machinery Association" auf der wire Düsseldorf 2018 begrüßen zu dürfen.

Die wire Düsseldorf ist schon seit vielen Jahren die weltweit größte und wichtigste internationale Handelsmesse für Hersteller und Verarbeiter aus der Draht- und Kabelbranche.

Auf der wire 2016 besuchten mehr als 38.000 Fachbesucher aus der ganzen Welt die Stände von über 1.330 internationalen Ausstellern aus 53 Ländern. In Anbetracht der kontinuierlichen Erholung der Weltwirtschaft und des aller Erwartung nach anhaltenden globalen Konsumwachstums deutet alles darauf hin, dass die diesjährige Veranstaltung die bisher größte Draht- und Kabelmesse sein und den allgemeinen Optimismus unter Kabel- und Drahtherstellern eindrucksvoll unter Beweis stellen wird.

Die IWMA ist stolz, Teil dieser bemerkenswerten Erfolgsgeschichte zu sein; sie ist ein Zeugnis der guten Zusammenarbeit zwischen Fachverbänden und Ausstellern aus der Draht- und Kabelindustrie und des herausragenden Organisationstalents der Messe Düsseldorf GmbH, mit der die IWMA seit dem Start der ersten wirklich internationalen Draht- und Kabelmesse, einem Vorläufer der aktuellen Veranstaltung, seit vielen Jahren erfolgreich Gemeinschaftsprojekte realisiert.

Die wire Düsseldorf bietet eine einzigartige Plattform für die Beschaffung neuer Technologien, die Erschließung neuer Geschäftschancen und die Entwicklung neuer Ideen, um die Branche voranzubringen, und die Ausgabe 2018 wird umfassend Gelegenheit für Gespräche über die neuesten internationalen Trends und die aktuellsten technischen Entwicklungen bieten und zur selben Zeit am selben Ort die bisher größte Zahl an Branchenexperten und innovativen Köpfen versammeln.

Die wire Düsseldorf 2018 muss man einfach gesehen haben!

Ich wünsche allen Besuchern, Ausstellern, Fachverbänden und Organisatoren eine erfolgreiche und unterhaltsame Messewoche.

Wir freuen uns auf Ihren Besuch am IWMA-Stand!

Martin Van Der Zwan

Welcome

It is my great pleasure to welcome visitors and exhibitors to wire Düsseldorf 2018 on behalf of the International Wire & Machinery Association.

For many years wire Düsseldorf has been the largest and most important international trade fair for wire manufacturers and processors.

wire 2016 saw over 38,000 trade visitors from around the world visit more than 1,330 international exhibitors from 53 countries. Due to the world's economy continuing to show signs of improvement, with global consumption expected to continue to grow, the indications are that this year's show will be the largest ever wire show to-date, demonstrating the general optimism among cable and wire producers.

The IWMA is proud to be a part of this remarkable success story; a testament to the collaboration of the wire and cable trade associations and exhibitors along with the exceptional organisational skills of Messe Düsseldorf GmbH, with whom the IWMA has enjoyed a long and successful relationship since the launch of the first truly international wire show, a forerunner to today's event.

wire Düsseldorf creates a unique platform for sourcing new technologies, developing new business opportunities, and generating new ideas to drive the industry forward, and this 2018 edition of the show will create a powerful forum for discussion of the latest international trends and technological developments and see the largest number of industry experts and innovators in the same place, at the same time.

wire Düsseldorf 2018 truly is the place to be!

I wish visitors, exhibitors, trade associations and the organisers a successful and enjoyable week at the show.

We look forward to seeing you at the IWMA booth!

30 Jahre wire und Tube in Düsseldorf:
Gemeinsam stark für die Märkte der Zukunft

wire and Tube's 30th Anniversary in Düsseldorf:
A Strong Duo for the Markets of the Future

Neuer Flächenrekord bei den Jubiläumsveranstaltungen 2018

Die internationalen Fachmessen für Draht, Kabel und Rohre, wire und Tube, blicken auf eine steile Erfolgsgeschichte *made by Messe Düsseldorf* zurück.

Vor 30 Jahren kam die wire über London und Basel in die nordrheinwestfälische Landeshauptstadt, 1988 wurde die Tube ins Leben gerufen und seither finden beide Fachmessen alle zwei Jahre gemeinsam in den Messehallen im Düsseldorfer Norden statt.

Seit 1988 haben wire und Tube eine rasante Entwicklung hinter sich. Mit derzeit elf internationalen Satelliten in Russland, China, Thailand, Indien und Brasilien und einem Beteiligungsgeschäft im Iran setzen sie auch international Schwerpunkte in den aufstrebenden Märkten dieser Welt.

Von den Anfängen bis heute:
Der Weg nach Düsseldorf

Bereits 1967 und 1970 fanden die ersten „wire style exhibitions" mit 2.400 verkauften Quadratmetern in London statt. Schnell wurde deutlich: Das ist der Treffpunkt der wachsenden britischen Draht- und Kabelindustrie!

Aufgrund der zentralen geographischen Lage innerhalb Europas entschlossen sich die damaligen britischen Veranstalter, die wire ab 1972 im zweijährigen Rhythmus im schweizerischen Basel stattfinden zu lassen. Hier wuchs sie zu einer florierenden internationalen Fachmesse bis 1984, dann wurde das Baseler Messegelände zu klein.

Ein erneuter Umzug stand an, diesmal zur Messe Düsseldorf, die die wire seit 1986 als Internationale Fachmesse Draht und Kabel

New Record Area at the 2018 Anniversary Events

wire and Tube, the international trade fairs for wire, cable and tubes, can look back on a meteoric success story *made by Messe Düsseldorf*.

30 years ago wire came to the regional capital of North Rhine-Westphalian from London and Basel and in 1988 Tube was called into being. Since then the two trade fairs have been hosted in Düsseldorf's exhibition halls every two years.

And since that time wire and Tube have seen swift development. Boasting eleven international satellites up to now in Russia, China, Thailand, India and Brazil and a participation in Iran the trade fairs are also creating international highlights on the emerging markets of this world.

From the Early Days until Today:
The Path to Düsseldorf

Already in 1967 and 1970 the first "wire style exhibitions" were held in London on exhibition space measuring 2,400m². It quickly became clear that this was the meeting point for the growing British wire and cable industry!

Due to its central geographic location in Europe from 1972 the then British organisers decided to hold wire every two years in the Swiss city of Basel. Here it grew into a flourishing international trade fair until 1984 when Basel's exhibtion centre became too small.

A further move then took place, this time to the Düsseldorf exhibition centre, which has successfully hosted wire since 1986 as an international trade fair for wire and cable. In 1988 this was joined by the international Tube fair.

erfolgreich durchführt. 1988 kam die Internationale Rohrfachmesse Tube dazu.

Seit 1988 gemeinsam in Düsseldorf: wire und Tube

In der Mitte Europas gelegen, mit idealen logistischen Anbindungen ins benachbarte Europa und nach Übersee, erweist sich der Messeplatz Düsseldorf bis heute als Heimat der beiden Leitmessen wire und Tube.

Seit ihrer geimeinsamen Premiere 1988 steigt die Entwicklungskurve beider Messen steil an: 1988 mit 560 Ausstellern auf einer Nettofläche von knapp 30.000 Quadratmetern als wire Düsseldorf gestartet, belegt die Internationale Fachmesse für Draht und Kabel im Jubiläumsjahr mit 1.374 Ausstellern aus 51 Ländern mehr als 65.000 Quadratmeter Ausstellungsfläche (Stand 02/18).

Die Tube startete bei ihrer Düsseldorfer Premiere 1988 mit 146 Ausstellern auf einer Fläche von 3.870 Nettoquadratmetern, jetzt, zum 30-jährigen Jubiläum, hat sich die Ausstellerzahl fast verachtfacht. 1.134 Unternehmen aus 55 Ländern waren bereits zwei Monate vor Messebeginn angemeldet. Sie belegen eine Nettofläche von über 52.000 Quadratmetern (Stand 02/18).

In Zeiten globaler, politischer und wirtschaftlicher Veränderungen, die noch dazu rasant voranschreiten, stehen wire und Tube unangetastet als No 1 Veranstaltungen ihrer Branchen weltweit. Wer in diesen Industrien produziert, verarbeitet und handelt, für den sind die alle zwei Jahre stattfindenden Gipfeltreffen der Branchen ein must.

Und die schnelle Entwicklung des Messeportfolios der Metallmessen geht weiter..., na dann, auf die nächsten 30 Jahre wire und Tube in Düsseldorf und *around the globe*...

Since 1988 wire and Tube together in Düsseldorf

Located in the heart of Europe and boasting ideal logistics links to neighbouring European countries and overseas the trade fair location of Düsseldorf has hosted the two leading trade fairs wire and Tube since 1988.

Since their joint premiere in 1988 the two fairs have undergone a meteroric rise: kicking off in 1988 with 560 exhibitors on net exhibition space of just under 30,000 m^2 wire Düsseldorf, the International Wire and Cable Trade Fair, will in its anniversary year host 1,374 exhibitors from 51 countries on over 65,000 m^2 of exhibition space (current as of 02/18).

Tube kicked off at its Düsseldorf premiere in 1988 with 146 exhibitors on 3,870 m^2 net while now, in its 30th anniversary year, exhibitors have increased almost eightfold. 1,134 companies from 55 countries had already registered two months prior to the start of the trade fair. They will occupy net space of over 52,000 m^2 (current as of 02/18).

In these times of rapid global, political and economic change wire and Tube are seen as the unchallenged No. 1 events in their sectors worldwide. For anyone producing, processsing and trading in these industries these summit meetings held here in the region every two years are a real must.

And the rapid development of our trade fair portfolio for the metal trade fairs continues ever onward ... so on that note to the next 30 years of wire and Tube in Düsseldorf and *around the globe*...

Notizen
Notes

We brought you communication!

In 1861 the German Johann Philipp Reis christened his invention that was transmitting sound via electrical wires ‚Telephone'. This original telephone was quickly improved and amended by other physicists. It became the cornerstone of the 20th century's communication, and by shrinking once insurmountable distances, became the lifeline of modern society.

NEUREUTER FAIR MEDIA

Neureuter heralds the age of a new communication. Fair Communication 2.0. We develop tomorrow's Fair Media. Admittedly, standing in the tradition and on the shoulders of other great German communication entrepreneurs does help. So we could focus on the thing we understand well: communication that catches on, globally. **www.neureuter.de**
